ACP Practice AdvisorSM

Immediate | Online | Practice Improvement

Improve patient care
and office efficiency
on *your* schedule with
expert online support
and resources

Welcome to ACP Practice AdvisorSM

Introducing ACP Practice AdvisorSM, formerly known as ACP Medical Home Builder, which was initially launched in 2009.

Improving your practice's ability to provide high-quality, safe, efficient, effective, and timely patient-centered care is now accessible, affordable, and adaptable to your practice. Whether you're ready to start down the path to be recognized or accredited as a Patient-Centered Medical Home (PCMH) or just want to make incremental changes, ACP Practice Advisor has all of the tools and resources you'll need.

Using the talents and capabilities of your entire office team, self-paced modules cover all aspects of how to become a high-functioning, well-performing practice.

Online and collaborative, ACP Practice Advisor helps you transform your practice – in easy steps, on your own timeline.

- Get ready with background information
- Conduct the initial assessment–ACP Practice Biopsy[®]
- Review your results and recommended resources
- Identify and implement desired changes
- Perform follow-up assessments to monitor your progress

New and Always Improving

Building upon the well-received ACP Medical Home Builder, new modules, resources, features, and functions have been added to help you identify improvement opportunities and select/implement changes. With ACP Practice Advisor, you're part of a community of practices, large and small, that is committed to change. Share and learn from peers and colleagues all working toward similar goals.

As new resources, modules, and enhancements are added, they will be immediately available at no additional charge!

Expert Advice Available Online

Need assistance or just want to make sure you're on the right track? It's all here, available at your convenience.

- View recorded webinars and videos, when you want, as often as you need.
- Practice-to-Practice "pearls" that contain user-submitted best-practice videos. Learn from colleagues sharing their experiences and insights.

Point Your Practice in the Right Direction

ACP Practice Advisor Modules feature:

- Background information.
- A case study that follows a practice as it completes the ACP Practice Biopsy and implements changes using the resources provided.
- A self-assessment, the Practice Biopsy, that provides a baseline score with comparison to all users of the ACP Practice Advisor. Your staff can complete the Practice Biopsies individually or in small groups, in any order and at any time.
- Reporting functions to help track progress over time, identify opportunities for improvement and compare your practice to others.
- A virtual bookshelf, the Resource Library, that aggregates articles/books, videos, webinars, and tools from each module into a searchable collection. Includes downloadable guides and policy templates.

Over 30 Modules in the Following Categories Provide Self-Paced Tools for Evaluation and Improvement:

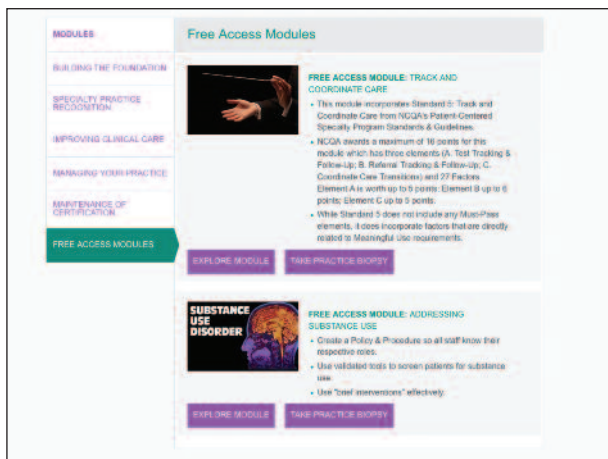

- Building the Foundation
- Managing Your Practice
- Improving Clinical Care
- Specialty Practice Recognition

MOC Credit

In order to be listed as "Meeting MOC Requirements," internal medicine physicians must earn a minimum of 20 MOC points for assessment of their clinical practice every five years. Select Practice Advisor modules provide MOC Points, each of which is worth 20 points towards Self-Evaluation of Practice Performance. Go to www.practiceadvisor.org/mocmodules for more information.

Get FREE Access to ACP Practice Advisor Modules

Thanks to the generosity of a number of grants, we are pleased to offer new visitors the opportunity to engage in featured modules and Practice Biopsies at no cost, period. These free modules illustrate how Practice Advisor works. Go to www.practiceadvisor.org/freemodules for details.

PCMH Recognition and Accreditation Made Easier

If moving toward the PCMH model seems like a daunting or even overwhelming task, ACP Practice Advisor is just what the doctor ordered. ACP Practice Advisor's Practice Biopsy questions cover the content from NCQA, URAC, and The Joint Commission.

And ACP Practice Advisor provides many customizable policies and procedures in Microsoft Word® format to help you develop your own written policies and procedure.
